

Your Safety Instructions Reminder

South Jersey Gas

We want to ensure that you and your family take the proper safety precautions by reminding you to let the professionals operate and service gas equipment. Please follow the safety guidance below:

Do not touch, service, or operate any South Jersey Gas owned equipment, including gas valves associated with your meter, which may be located inside or outside of your residence - no

matter how easy the procedure seems. Operating any South Jersey Gas equipment yourself could result in a serious safety hazard.

Qualified South Jersey Gas technicians and contractors service and maintain our natural gas equipment

such as pipes, valves, and meters to ensure your safety and service. It is our responsibility to service and maintain this equipment.

Gas lines and connections beyond the meter are owned by you, but we highly recommend that these lines **only be serviced by a licensed plumber or**

qualified contractor trained to perform work on natural gas lines, including your gas burning appliances.

Your Safety Instructions Reminder

(continued)

South Jersey Gas

If you need to have the gas to your home temporarily turned off, please contact South Jersey Gas at **1-888-766-9900** to schedule an appointment for one of our technicians to turn off the gas. A South Jersey Gas technician will also restore gas service to your home.

Natural Gas is a safe, efficient, and economical fuel when installed and maintained by trained professionals. It's important to know that turning the valve leading to your gas meter on or off, or operating South Jersey Gas equipment yourself could result in serious safety hazard for you or others nearby.

When in doubt, call South Jersey Gas at **1-888-766-9900** for information on how to handle your gas equipment.

South Jersey Gas is here to ensure proper precautions are followed for the safety of you and your family.
