STATE OF NEW JERSEY
BOARD OF PUBLIC UTILITIES

IN THE MATTER OF THE PETITION OF SOUTH JERSEY GAS COMPANY FOR APPROVAL OF A RATE ADJUSTMENT PURSUANT TO THE INFRASTRUCTURE INVESTMENT PROGRAM ("IIP")	**: : : : :**	**BPU DOCKET NO. GR26040173** **12+0 UPDATE SUMMARY**

South Jersey Gas Company ("South Jersey" or the "Company") files this Petition for approval of a rate setting pursuant to the Company's Infrastructure Investment Program ("IIP"), which was approved by the New Jersey Board of Public Utilities ("Board" or "BPU") on June 8, 2022 in BPU Docket No. GR20110726. With the IIP, South Jersey is authorized to invest up to $200 million in the Company's gas distribution system over the five (5) year period commencing on July 1, 2022 and ending on June 30, 2027, to replace up to 250 miles of pre-code coated steel and pre-1971 vintage Aldyl-A plastic mains and related services, as well as the installation of excess flow valves on new service lines ("IIP Projects"). This filing reflects investments associated with in-service IIP Projects during year 4 of the IIP, which encompasses the period from July 1, 2025 through June 30, 2026 ("Program Year 4").

Cost recovery for in-service IIP Projects is effectuated by an annual rate adjustment effective on October 1. The present Petition seeks Board approval to recover the revenue requirements associated with IIP Projects placed in service during Program Year 4, through a rate adjustment to take effect on October 1, 2026.

If approved by the Board, the impact of the proposed rate adjustment on a residential heating customer using 100 therms would be an increase to the customer's monthly bill of $1.18 from $203.74 to $204.92, an increase of 0.58%, as compared to rates in effect as of July 1, 2026.

Background:

South Jersey Gas ("SJG") has previously engaged Picarro to complete Advanced Leak Detection surveys ("ALD Survey") on certain portions of its distribution system. As required by the IIP Order[1], SJG has performed an analysis to determine whether communities that are overburdened ("Overburdened Communities") are subject to greater leak density than its surrounding communities. The following outlines the approach as well as the findings.

Approach:

South Jersey Gas utilized the New Jersey Department of Environmental Protection ("NJDEP") data to determine which communities and/or census blocks within its service territory were considered Overburdened Communities. The information in spatial form was extracted into tabular form to complete the analysis. Shown below is the interactive information available through the NJDEP website.

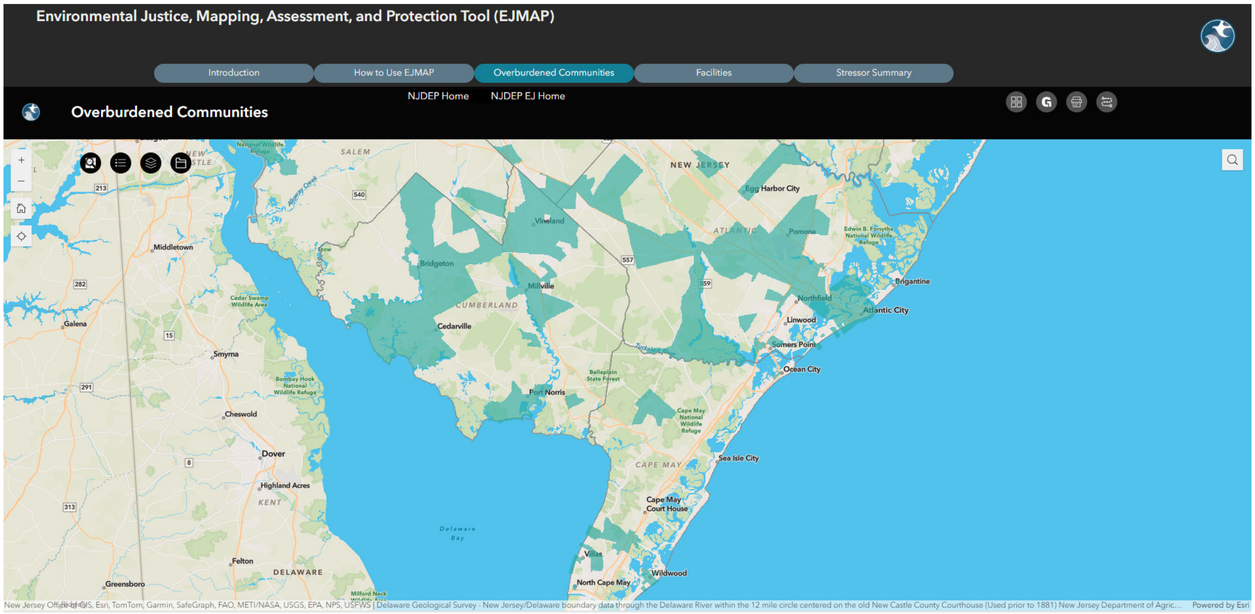
[1] In re *the Petition of South Jersey Gas Company to Implement an Infrastructure Investment Program ("IIP") and Associated Recovery Mechanism Pursuant to N.J.S.A. 48:2-21 and N.J.A.C. 14:3-2A*, BPU Docket No. GR20110726, Order dated June 8, 2022 ("IIP Order").



Appendix A at the end of this report lists ALD Survey information sorted by estimated emissions for surveys completed by the Company through Program Year 4. Any data point that falls outside of an Overburdened Community has been excluded. Remaining within the table are emissions information for any area within the service territory where the final ALD Survey has been conducted and are considered to be within an Overburdened Community.

Analysis & Conclusion:

In its last cycle of ALD Survey data, SJG has recorded varying levels of emissions on pipe segments totaling approximately 17.6 miles. Within the 17.6 miles of emissions data, approximately 4.9 miles fall within Overburdened Communities, or roughly 28%. On a percentage basis, these communities are not disproportionally affected by emissions.

Through SJG's predecessor infrastructure replacement programs that have been completed, it has renewed facilities in various municipalities. Using Winslow as an example, which had approximately 1/2 mile of emissions data present in the last survey, the Company's legacy infrastructure replacement programs in addition to the IIP Program have reduced impact to this area. Additionally, SJG has completed and/or will continue to complete replacements, under the current IIP, in municipalities such as Egg Harbor Township aimed at further reducing emissions within the community. The Company has placed emphasis and priority on repairing larger emitting leaks as ALD Surveys were conducted thus mitigating any lingering impacts that may occur in these communities. Lastly, SJG continues to reprioritize replacement projects based on the ALD Survey information collected.
